Awaken The Engineer Inside You

Rulebook

A complete Guide to

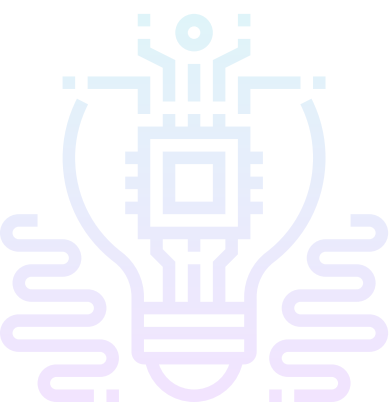

General rules

Theme: “Innovate for Impact – An Open Theme on the Sustainable Development Goals (SDGs)”

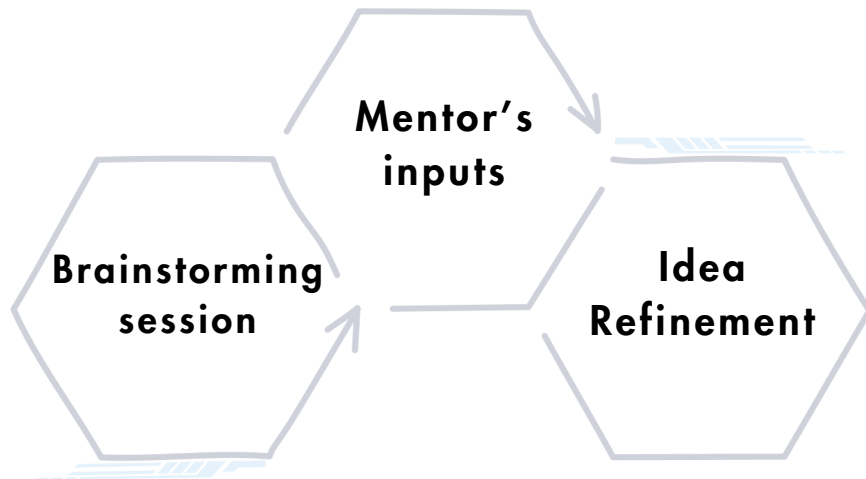

- The competition is open to all undergraduate students irrespective of their streams/branches of B.E./B.Tech.
- Each team must consist of a minimum of 2 and a maximum of 4 participants.
- Registration is mandatory for participation. On-the-spot registration may be permitted for interested participants.
- **Registration must be completed by 9:40 AM on Day 1.**
- The execution method and proposed solution must be original, unique, and developed by the participating team.
- Participants are responsible for their personal belongings and are expected to maintain proper discipline and professional conduct throughout the event.
- Participants must respectfully cooperate with the organizers, mentors, and judges and adhere to their instructions and decisions.
- Teams arriving after the designated time may be disqualified from the event.
- All facts, figures, data, images, and other external content used in the presentation must be properly attributed and referenced.
- Participants must adhere to the prescribed time limits for each stage of the Ideathon.
- Plagiarism, copied work, or presenting another team's work as one's own may result in disqualification.
- Teams are responsible for arranging the required materials, equipment, components, software, and other resources needed for their project showcase, unless otherwise specified by the organizers.
- **Dress Code:** Participants are expected to wear casual attire on Day 1 and formal attire on Day 2.
- The decision of the judges and organizing committee shall be final.

Day 1

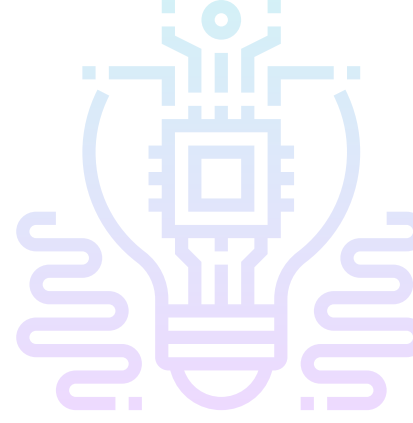

consistsof–

- **Conceptual Sketch / Flow Diagram Sketch Presentation to Judges**
- The day begins with a brainstorming session where teams develop and refine their ideas around the identified problem.
- Teams will interact with mentors to receive guidance, constructive feedback, and suggestions to strengthen their proposed solution.
- Based on the discussions and mentor inputs, teams will refine their ideas and prepare a conceptual sketch/flow diagram representing their proposed solution.
- Each team will have a maximum of (5+2) minutes to present their idea and proposed approach to the judges.
- The presentation should briefly cover the problem and its significance, existing approaches and their limitations, and the proposed technique/approach.
- The sketch may include suitable block diagrams, flowcharts, system architecture, process flows, or other visual representations to communicate the proposed approach.
- The presentation and sketch should reflect the improvements made through brainstorming and mentor interaction.

Day 2
consistsof–

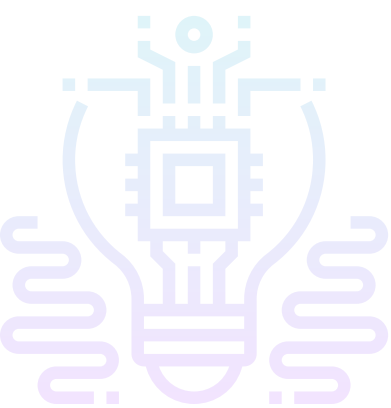

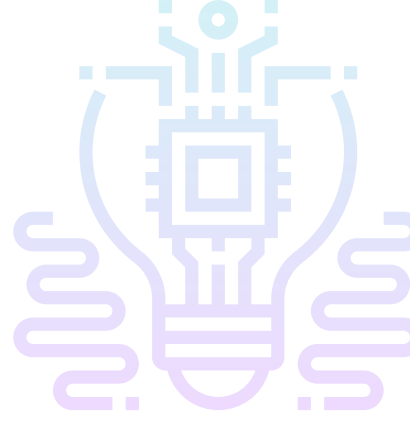

FINAL PROJECT PRESENTATION & SOLUTION SHOWCASE

**Poster | Catalogue | Model | Prototype | Simulation | Other
Creative Format**

Final Evaluation

- Teams will present their final innovative solution, building upon the concept refined during Day 1.
- PowerPoint presentations are not permitted.
- Each team must **choose any ONE format** from the project showcase options to present their solution.
- The chosen format should be unique, creative, and effective in communicating the proposed solution.
- The final presentation should clearly communicate the proposed solution, its working/approach, innovation, feasibility, and expected impact.
- Each team will have a maximum of (5+2) minutes to present their final solution to the judges.
- Teams should be prepared to answer questions from the judges regarding their proposed solution.
